Re: Patent Application of Brad A. Armstrong
Applicant's Docket No. 30

Serial No.: 09/715,532 Filed: 11/16/2000

Title: 3D CONTROLLER WITH VIBRATION

Applicant's mailing address: Brad A. Armstrong
P.O. Box 1419
Paradise, CA 95967

Examiner: Michael Moyer
Group Art Unit: 2675

Sir:

Following is a copy of a return receipt Post Card date stamped by the PTO March 11, 2003, and a copy of the U.S. Express Mail Receipt Customer Copy showing a mailed date of March 11, 2003. Following those two copy sheets is a true copy of a 24 page amendment filed at the PTO on March 11, 2003 as indicated by the above mentioned Post Card.

Please enter the amendment.

Also, in the 3/11/03 amendment in the Remarks section some language was suggested to assure that the claims as issuing will have been examined with the same meaning as Applicant originally intended. In this spirit Applicant further wishes to verify that the Examiner understood during his examination of the claims that a "platform" is an actuating member and that a "potentiometer" is a variable resistor of electricity. If the Examiner did not examine the claims with this or a closely similar definition in mind, then the Examiner is respectfully requested to notify

Applicant of such in writing.

Applicant wishes to assert that the above and the 3/11/03 amendment are not to secure the Patent and do not surrender any subject matter.

If the Examiner can do anything to expedite the issuance of this application, Applicant would greatly appreciate such assistance because as the Examiner knows substantial delays have been incurred after the receiving of Notice of Allowance due to delays in the Petitions Office regarding revocation of the unnecessary Terminal Disclaimer and the original 3/11/03 amendment which has apparently been lost.
Thank you very much.

Respectfully,

Date: *June 4, 2003*

Brad A. Armstrong
